

ASANSOL GIRLS' COLLEGE, ASANSOL,

Dr. Anjali Roy Sarani, P.O. Asansol -4, Dist.- Paschim Bardhaman, West Bengal 713304

(Affiliated to Kazi Nazrul University, Asansol)

2019-2020

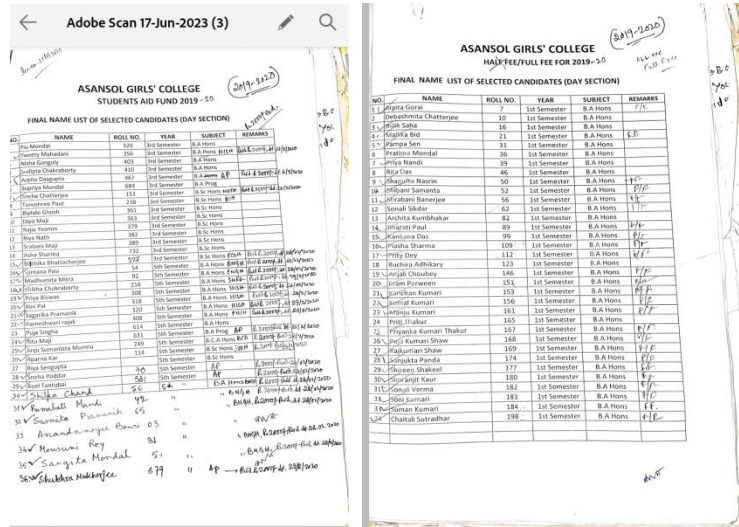

Metric No.	
7.2.1	<p data-bbox="391 720 594 751">Best Practice 1</p> <p data-bbox="451 800 760 831">1. Title of the Practice</p> <p data-bbox="480 869 1092 900">To help students who have financial difficulties.</p> <p data-bbox="451 953 841 984">2. Objectives of the Practice</p> <p data-bbox="490 1022 1458 1127">The aim of the practice is to provide the financial support to those who have problem in paying tuition and other fees. This will help those students to continue their studies without any mental stress.</p> <p data-bbox="451 1148 662 1180">3. The Context</p> <p data-bbox="490 1218 1458 1302">This practice will help those students to continue their studies without any mental stress.</p> <p data-bbox="451 1346 667 1377">4. The Practice</p> <p data-bbox="490 1415 1450 1701">The college receives students from various backgrounds. There are several students who are meritorious but incapable of paying tuition and other fees due to their financial conditions. It is the interest of the institution to see those students to complete their courses without any problem. The institution has initiated a scholarship scheme to distribute fund to the needy students as full semester tuition fees waiver & half semester tuition fees waiver based on their financial status and also performance in the academic and related activities.</p> <p data-bbox="480 1724 794 1755">5. Evidence of success</p> <p data-bbox="490 1793 1450 1898">A large percentage of students come to study here from the remote corners of this district and often belong to the lowest income groups. Many are first generation learners and receive absolutely no support from their</p>

families. These young women would not be in a position to pursue higher education if it were not for the extensive support—financial and otherwise—offered by the College.

6. Problems encountered and Resources Required

This practice is hampered by a lack of sufficient funds.

7. Notes(optional).

Best Practice 2

1. Title of the Practice

A sustainable campus with ample greenery that supports an eco-friendly environment

2. Objectives of the Practice

To promote environmental awareness and sustainability, the college works hard to keep its campus clean and green. It is also one of the most popular college practices. The college's policy is to undertake environmental awareness programs and activities on a regular basis.

3. The Context

This helps to preserve the greenery on our campus and fosters an appreciation for, understanding of, and responsibility for the environment and its preservation for sustainable development. This helps to preserve the greenery on our campus and fosters an appreciation for, understanding of, and responsibility for the environment and its preservation for sustainable development.

4. The Practice

Students and faculty are invited to join in the green projects listed below at our campus:

- Making the campus plastic, smoke free and clean – Keeping in the mind the better environment and health of all, the college campus is being made clean, free from any sort of plastic and use of smoke in any manner.
- The campus's green cover is well maintained by a gardener, departmental professors, and students, in addition to a documented Medicinal Plant Garden.
- Environmental Day Celebrations, Tree plantation, maintenance of garden are regularly conducted.
- Seminar talk on environmental awareness, exhibition are conducted
- Students conscientiously participate in the NSS-organized campus cleanliness initiatives.

5. Evidence of success

Plants have been documented, including endangered and rare plants like Asan (crocodile bark tree), *terminalia tomentosa*; Phalsa (Indian sherbet berry), *grewia asiatica*; various fruit bearing trees, including the mango, guava, jamun (black plum), jackfruit, and jamrul (malay rose apple); and numerous flowering trees, including Ashoka, Shimul, Jarul, and China rose. Crows, common mynahs, pigeons, nightingales, kites, sparrows, seven sisters, rufus treepies, orioles, green-bee-eaters, squirrels, bees, and ants are some of the animals that use these places as breeding grounds. On the college grounds, a medical plant garden has been established where neem, bisalya karani, and other therapeutic plants are nurtured.

6. Problems encountered and Resources Required

Plant growth is hampered by a lack of land with sufficient sunlight throughout the day. The college needs more skilled workers and resources to build and manage the medicinal plant garden on a vast scale.
